

The bar graph illustrates the percentages of film release and sales of cinema ticket for these four categories: romance, drama, comedy and fantasy, in the year 1996 and 2000.

There is a significant increase of ~~based on Drama, Comedy and Fantasy~~ Overall, percentage of films released ~~from the~~ from the year 1996 & 2000.

Overall, ~~there is a sig~~

Drama, Comedy and Fantasy shown ^{in both} rise in percentage of films released and percentage of tickets sold in year 1996 & 2000. While, romance remained stagnant for films released and shown a drop for tickets sold.

Drama

In 1996 & 2000 Drama released peaked the chart with being 20% at roughly 25% & 35% respectively Tickets

Drama releases

significant shown increment of

Films released for Drama peaked the chart in both years. ~~accounts~~ It accounted for ~~roughly~~ a quarter in 1996 and marginally greater than one-third in 2000.

It's 1996 not 1999 - too large to correct now

Similarly, ~~Comedy and Fantasy both~~
significant increase is shown by
films of genera: comedy and fantasy.
Surprisingly, Romance films ^{shown no change in frequency and} were rarely released,
just at about 5%.

Surprisingly, Romance films ^{releases} ~~stays~~ remained
stagnant. ~~and they were~~ The contribution
by it was negligible. ~~at just~~, marginally
low, at just 5%.

~~On the other side~~

~~Similarly~~
Similar pattern is shown by percentage of
cinema ticket sales. Comedy ^{sales} ~~peaked~~ topped
the chart. Comedy sales ~~were~~ ^{in 1996} at top,
Accounting for 20% & 25% ^{in 2000} respectively.
The ticket sales were topped by ^{films of} Comedy
genera, ~~accounting~~ accounting for 20% & 25% ^{in 1996} in 2000.
Likewise, Drama & Fantasy sales rose up.
However, ~~Romance films~~
The sales of romance films dropped
to ~~so low that I fear to say~~ so low
However, despite being already low,
romance sales dropped to about
2%.
